

25 YEAR LIMITED (LIFETIME) STRUCTURAL WARRANTY

Elk Falls Engineered Timber Flooring is provided with a 25 Year Limited Lifetime Structural Warranty to cover the performance and appearance of the plank from delamination, splitting and geometry that would affect the planks assembly and in-service performance. **The planks must be inspected prior to use and any planks deemed not fit for service should not be installed and will not be covered by warranty provisions.** Due to the variable climate conditions within Australia and New Zealand planks may display slight bow and twist once removed from the cartons this is not considered a structural defect unless the planks cannot be assembled after an adequate period of acclimatisation. **(Note; planks should not be unpacked overnight and or left loose prior to install).** Grading provisions provide for patching and filling of natural characteristics with appropriate colour matched filler, this forms an acceptable visual for the natural planks.

After installation certain cupping and gapping issues could be considered site related installation or performance issues and may not be covered by the warranty and other consumer related product purchase laws. Elk Falls Hickory Flooring should be installed as per our Installation Guidelines.

These guidelines can be provided by contacting; www.preferencefloors.com.au or through a review of optimum installation practices as noted on the ATFA web portal.

Warranty provisions are extended to the individual or company that is nominated as the original point of purchase and or initial occupant at the installation site. Warranties are not transferrable.

Our Elk Falls Hickory Flooring is only warranted for installation over Hydronic In-Slab floor heating. No other floor heating system method is warranted.

20 YEAR LIMITED RESIDENTIAL WEAR WARRANTY

Elk Falls Hickory Flooring provides for a 20 Year Limited Residential Wear Warranty that guarantees that the finish coating will not wear through to the underlying uncoated surface. This in course implies that the appropriate conditions for use are in line with the provisions set out in our Maintenance and Care instructions. Areas less than 10% of the surface area that could be related to high traffic wear or incidental damage will not be covered by the warranty provisions.

5 YEAR LIMITED COMMERCIAL WEAR WARRANTY

Elk Falls Engineered Timber Flooring provides for a 5 Year Limited Commercial Wear Warranty that guarantees that the finish coating will not wear through to the underlying uncoated surface. This in course implies that the appropriate conditions for use are in line with the provisions set out in our maintenance and care instructions. Areas less than 10% of the surface area that could be related to high traffic wear or incidental damage will not be covered by the warranty provisions. Instructions and guidelines for keeping your floor in optimum appearance can be obtained directly from your point of purchase or obtained from contact via our web portal www.preferencefloors.com.au

AUSTRALIAN CONSUMER LAW UPDATE 2012

Elk Falls Hickory Flooring is provided with limited performance warranties that cannot be excluded under Australian Consumer Law. Entitlements include a replacement or a refund for what is termed as a major failure and for agreed reasonably assessed associated costs.

Entitlements also allow for the goods to be replaced if the product fails to meet an agreed acceptable quality and that quality does not constitute a major failure.

WHAT IS AN ACCEPTABLE QUALITY AND USE GUIDELINES?

Elk Falls Hickory Flooring is designed to be installed for interior use only; it is not designed for external use. **The product will not be covered by warranty provisions for use in wet areas, (Bathrooms or similar).** In areas where incidental spills may occur, such as Kitchens or Living areas, spillage should be wiped dry as soon as possible to avoid moisture ingress and possible plank deformity. The product should be installed as per install guidelines, special attention should be directed to plank inspection prior to install. Slab or substrate should be inspected and suitable for flat and dry installation. For heating and cooling, all mechanical systems must be compatible and comply with environmental performance attributes for natural products such as Timber.

Internal temperature and humidity controls need to be aligned to match performance guidelines for natural timber products such as Elk Falls Hickory Flooring. Evaporative cooling systems must be installed with adequate ventilation and operation should be as per system recommendations. Poor use of evaporative cooling systems may create very high internal humidity within the home. Cupping and plank deformity may result as a direct cause of high or low internal humidity. (Refer; Instructions and Care guide).

WHAT DETERMINES A MAJOR FAILURE?

Elk Falls Hickory Flooring is a natural product, characteristics such as knots, face checking, blemishes and surface indentations are normal and **will not be considered as a Major Failure**. This will also extend to slight coating variations for gloss levels and sheen viewed in an indirect light environment (curtains / shades closed). Seasonal change resulting in slight gapping, consistently over many planks along with incidental movement of planks would be considered normal as a part of the building environment and would not constitute a Major Failure. Cupping, crowning and shrinkage after installation are considered site related and will not be warranted as per the Limited Structural Warranty. These matters if they occur may require contact with your builder insurance for inspection to discover the likely cause.

The product manufacturer warranties do not cover installation and site suitability; this remains the responsibility of the installer/ contractor. Once installed the product is deemed to be suitable for use and plank defects or building structure faults that should have been removed or assessed prior to installation will not be covered by warranty provisions. This will be a matter between client and contractor. We would recommend that you always ask for installation or contractor warranties to cover workmanship as these are not covered by the manufacturing warranties. Structural plank delamination or surface coating deformities from normal in-service use may require a service inspection. If this arises immediate contact with your initial point of purchase is recommended.

The limited warranties are subject to the following;

- The warranty provisions will not cover installations practices not consistent with manufacturer's guidelines. Floor care and maintenance must be conducted in line with our product guidelines to avoid coating and product damage. Warranty provisions will not cover a poorly maintained floor.
- Incidental scratching, chipping and indentations from external sources would be considered site related and therefore not covered by warranty provisions. **Please cover flooring with adequate protection if construction is still occurring at the site.**
- **Avoid laying floor Rugs or Mats for approx. 6-8 weeks after installation, this will allow the floor surface an even exposure to available UV. Reposition rugs to avoid long-term UV variation on high UV exposed areas.**
